

Always On, by NuvoLinQ

NuvoLinQ's Always On service is the perfect solution to keep your business connected 24/7.

NuvoLinQ offers an easy-to-install failover solution to protect your business from wired connection outages. Our failover router detects outages and *automatically* switches to 5G/4G/LTE coverage, ensuring your computers, IP phones, IoT devices and payment terminals stay online. You'll have complete visibility through our LinQView portal for real-time alerts and usage monitoring.

How does NuvoLinQ Business Continuity Service work?

Device

Pre-configured and shipped to your location with simple 3 step instructions, warranty, technical support for an easy Plug-and-Play activation.

Wireless Connectivity

Continuous Tier 1 wireless network connectivity with no user intervention when wired connection fails to ensure seamless business continuity and operations.

Portal

LinQView portal monitors and manages primary and failover connections with options to set alarms and restrict application usage if desired.

Key Features

Automatic Backup Connectivity

Kicks in automatically when outage occurs and reverts back when wired connection is restored.

5G/4G/LTE Coverage

On secure and resilient Tier 1 national and global networks.

Simple Installation

Preconfigured set-up can be added in a few easy steps.

Advanced Reporting – LinQView portal for signal strength, uptime, and event logs.

Pricing

Monthly fee includes:

- 7/24 Backup connectivity to 5G/4G/LTE network
- LinQView Portal & Technical Support

Usage

- Failover connection will be billed in increments of 1GB.

Router
